SHORT WAVE APPARATUS

ROSE "MIDGET" RADIATHERM

Especially Designed
for
**Portable
Service**

Cat. No. 1331
"MIDGET" RADIATHERM

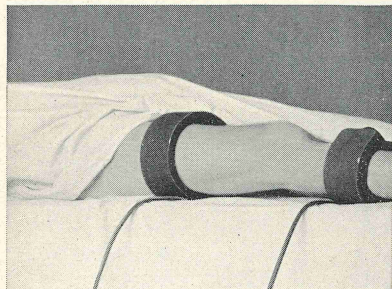

▼ A New Rose ▼ "MIDGET" RADIATHERM

Especially Designed for Portable Bedside and Auxiliary Service

Two R110 Power Tubes

Built To Rose Standards

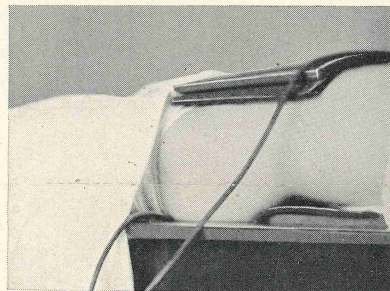

Cuffs or Pads

Standard cuff or pad electrodes, the specialists' sinus mask, orificial applicators, in fact, virtually all condenser type Short Wave electrodes may be used with the "Midget." Specifically engineered for therapeutic purposes, this surprising instrument achieves resultful Radiathermic therapy at an unusually low cost.

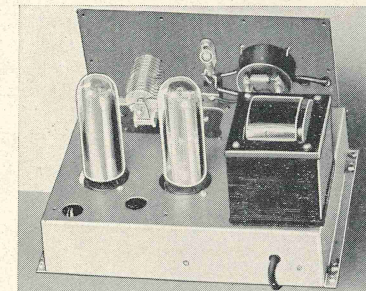

Ample Power

The power output of the "Midget" is ample to energize even 9" x 11" electrodes through a two hundred pound patient and still permit the use of a felt spacer to minimize any possibility of excessive superficial heating. Comparison with apparatus costing twice as much is invited.

Craftsmanship

Rose craftsmanship has become an enviable tradition and the "Midget" upholds all of the standards which have made Rose products long-lived and unexcelled in efficiency. 12 meter wave length to avoid critical technics, single dial control, and a single pair of treatment terminals are examples of its extreme simplicity.

Critical inspection of the "Midget" is welcomed, especially "behind the panel." Here are found the fire-proof steel chassis, Amperex graphite-plate Tubes, air-spaced condensers and similar costly construction practices ordinarily associated only with far more expensive apparatus.

The push-pull, tuned-plate, tuned-grid circuit is inherently balanced to prohibit accidental tube overloading under any con-

dition, a characteristic Rose engineering practice, and the fundamental reason for the broad and simple tuning typical of all Rose Radiatherms.

Contained in a carrying case 15½" x 11" x 9" and weighing but 35 pounds complete, the "Midget" is ideally suited to portable service, and its remarkable power output permits of extensive use in the office to augment other apparatus taxed by a busy practice.

PRICE, complete with 2 Pad Electrodes, Tubes, Line Cord, etc. - - - **\$160.00**
